PROFILE SUMMARY

B.Tech Computer Science student specializing in Cybersecurity, with hands-on experience in network security, threat analysis, vulnerability assessment, and secure system configuration. Completed internships in Cyber Security (Uptoskills) and Full Stack Web Development (intrnForte) and built security projects spanning AI-based threat detection, offensive security automation, and ransomware detection. Seeking an entry-level SOC Analyst / Security Analyst / VAPT role or internship to strengthen an organization's security posture.

EDUCATION

B.Tech, Computer Science and Engineering (Cybersecurity) 2023 – 2027
Hindustan University, Chennai

SKILLS

Network Security: Firewalls, VPNs, IDS/IPS, Encryption, Secure Protocols (HTTPS, SSL/TLS)
Cybersecurity Fundamentals: Threat analysis, Vulnerability assessment, Risk management
Hands-on Skills: Network monitoring, Packet analysis, Secure system configuration
Tools: Kali Linux, Nmap, Burp Suite, Gobuster, SQLMap, Metasploit, theHarvester, Amass, Netcat, Wireshark, Git
Programming & Web: Python, HTML, CSS, JavaScript, REST APIs

INTERNSHIP

Cyber Security Intern — Uptoskills (New Delhi) 10 Dec 2025 – 10 Mar 2026
Online | Certificate ID: US-INT-2026-K1330ZZ (issued 15 Apr 2026)

- Completed a 3-month internship in the Cyber Security domain, working on a project that applied network monitoring, threat analysis, and secure configuration practices.
- Awarded a Certificate of Internship Completion for demonstrating technical proficiency and professional standards.

Full Stack Web Development Intern — intrnForte Completed Nov 2024
Online | 10-week project-based internship training (certificate dated 07 Nov 2024)

- Designed and built responsive, user-friendly websites using HTML, CSS, and JavaScript.
- Developed secure, scalable, and interactive web applications integrating databases and APIs.

Tools: HTML, CSS, JavaScript, Git, APIs

PROJECTS

ATTACK-DNA-X | AI-Powered Cyber Threat Detection Platform

- Developed an AI-driven platform to detect malicious activity and generate “Attack DNA” profiles.
- Built REST APIs and an interactive dashboard visualizing threat patterns, attack classifications, and severity.
- Designed a modular architecture supporting scalable threat analysis.

Tools: Python, FastAPI, React.js, Machine Learning

Offensive Security Automation Framework

- Developed a Python framework automating reconnaissance, scanning, enumeration, vulnerability assessment, risk scoring, and reporting.
- Implemented GUI support, dashboard generation, screenshot capture, and multi-target scanning.
- Generated PDF, JSON, CSV, and HTML reports for security assessments.

  Tools: Python, Nmap, theHarvester

RansomShield | Real-Time Ransomware Detection & Containment

- Developed a real-time ransomware detection system with file monitoring, behavioral analysis, alerting, and event logging.

  Tools: Python, Watchdog

Loan Eligibility Prediction using Machine Learning

- Built a machine learning model to classify loan eligibility from customer financial data.

E-commerce Website with ML-Based Recommendations

- Developed an e-commerce website featuring machine learning-based product recommendations.

CERTIFICATIONS

- **Cyber Security Internship Completion Certificate** — Uptoskills, Dec 2025 – Mar 2026 (ID: US-INT-2026-K1330ZZ; verifiable via hr@uptoskills.com)
- **Internship Training Certificate (Full Stack Web Development)** — intrnForte, 10 weeks, Nov 2024
- **NCC "C" Certificate** — National Cadet Corps, Navy Wing
